

# How to install cabal and quickCheck?

## Step 1:

Visit the official Haskell website, choose your OS:

I am on windows.

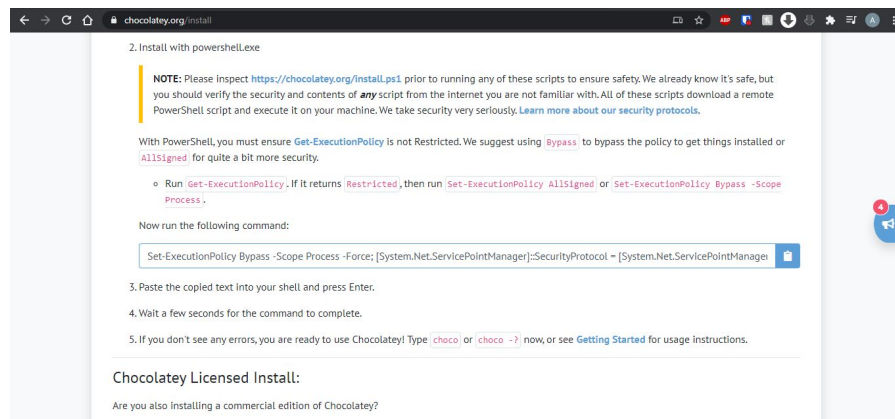

<https://www.haskell.org/downloads/#platform>

## Step 2:

For windows you need Chocolatey from this website:

<https://chocolatey.org/install>

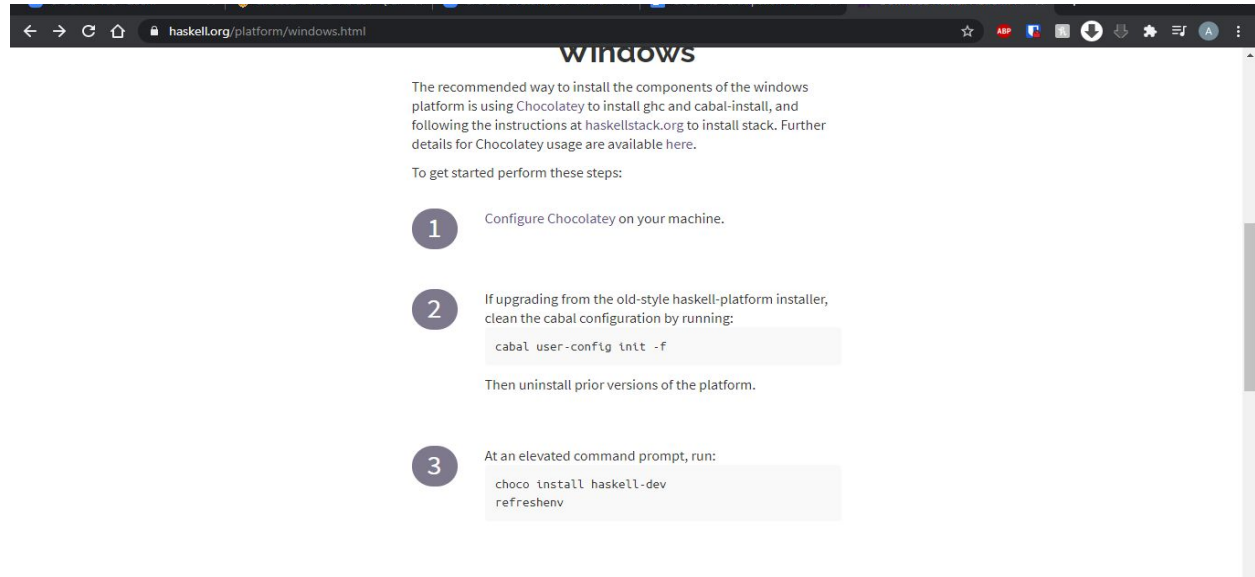

Open PowerShell from windows search in admin mode. Copy the command from Chocolatey site and paste/run in PowerShell.

### Step 3:

Once install is done follow the next two steps from this site:

<https://www.haskell.org/platform/windows.html>

These commands will download the Cabal build system and Haskell. Follow and accept the prompts in PowerShell.

### Step 4:

Use the following command to download QuickCheck:

`cabal install QuickCheck --lib`
